

**REMARKS**

Various amendments are made to the specification without introducing new matter.

The title is changed to be descriptive of the new claims.

At page 1, a cross-reference is provided to the parent application, serial number 09/774,952, and to the original priority application, serial number 09/574,541.

At pages 11 and 15, a reference is made to Fig. 5A, which is included herewith. Fig. 5A was added by amendment in the parent application, serial number 09/774,952. Fig. 5A is supported by text within the original priority application, serial number 09/574,541, and hence does not constitute new matter.

At page 25, filing and issuance information is included for applications that were referred to by their attorney docket numbers in the original priority application, serial number 09/574,541. No new matter is added.

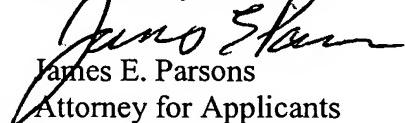

The Abstract is replaced with a shorter version that reflects the claims.

New claims 36-42 are added. These claims are similar to, but not identical to, the claims that were allowed in the parent application, serial number 09/774,952. Support for the claims is provided in Figs. 4, 5, and 5A, and in the associated text of the specification, among other places.

The undersigned may be reached by telephone at 408 451-5906.

Customer No.: 022888

Respectfully submitted,

  
James E. Parsons
